DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

- The primary reasons for allowance for claims 1-16 are the inclusion of a printing adjusting method, an inkjet printing apparatus, and an inkjet printing system comprising the steps of selecting a mode from a plurality of modes having different dot arrangements and determining an adjustment value that varies a drive timing for nozzles between a forward scan and a backward scan in accordance with the selected mode. It is these limitations that have not been taught, found, or suggested by prior art, either alone or combined as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Otsuki (6,425,652) teaches a bidirectional printer that prints dots in the forward and backward scans at substantially equal rates to take mechanical vibrations into accounts

Art Unit: 2861

- Meyer et al. (6,533,393) teach an inkjet printer that prints black and color printing modes bidirectionally
